How to send mail from localhost XAMPP using PHP

📅 March 22, 2020

How To Send Mail From Localhost XAMPP Using PHP

To send mail from localhost XAMPP using Gmail, configure XAMPP after installing it. Follow the below steps for the same.

Steps to Send Mail From Localhost XAMPP Using Gmail:

Open XAMPP Installation Directory.

Go to C:\xampp\php and open the php.ini file.

Find [mail function] by pressing ctrl + f.

Search and pass the following values:

SMTP=smtp.gmail.com

smtp_port=587

sendmail_from = YourGmailId@gmail.com

sendmail_path = "\"C:\xampp\sendmail\sendmail.exe\" -t"

Now, go to C:\xampp\sendmail and open the sendmail.ini file.

Find [sendmail] by pressing ctrl + f.

Search and pass the following values

smtp_server=smtp.gmail.com

smtp_port=587 or 25 //use any of them

error_logfile=error.log

debug_logfile=debug.log

CONNECT WITH ME

auth_username=YourGmailId@gmail.com
 auth_password=Your-Gmail-Password
 force_sender=YourGmailId@gmail.com(optional)

Here is the actual code that you have to write

Script To Send Mail:

```
<?php
$to_email = "receipient@gmail.com";
$subject = "Simple Email Test via PHP";
$body = "Hi, This is test email send by PHP Script";
$headers = "From: sender email";

if (mail($to_email, $subject, $body, $headers)) {
    echo "Email successfully sent to $to_email...";
} else {
    echo "Email sending failed...";
}
```

****Note:** If you are getting a warning message then Please configure "Less secure apps" settings as shown below. Sometimes without turning on the 'less secure apps' is the main reason the user didn't receive the mail.

=> Turning on 'less secure apps' settings as mailbox user

Go to your (Google Account).

On the left navigation panel, click Security.

On the bottom of the page, in the Less secure app access panel, click Turn on access.

If you don't see this setting, your administrator might have turned off less secure app account access (check the instruction above).

Click the Save button.

****** Now your email will be sent successfully. Have a good day and please share your story in the comment box.

try to enable two step verification on google account and generate an app password from there and use the same password to configure sendmail.ini file and this method will work 100% rather than original password.

7 Coolest Offices in California

When you first heard the word office? What is the first thing that comes into your mind?

You must be wondering that offices only mean white walls, dark doors, and white cubicles.

These were the days of the Grey that now has been gone.

Nowadays, many companies invest their money in the interior of the offices because it's truly said, "You should love the space where you work".

Hello Sir, I am huge fan cum student of yours i have learnt alot from your tutorials i am facing some errors into my xampp server which are as follow:

Error 1. The phpMyAdmin configuration storage is not completely configured, some extended features have been deactivated. Find out why.
Or alternately go to 'Operations' tab of any database to set it up there.

Error 2. A newer version of phpMyAdmin is available and you should consider upgrading. The newest version is 5.0.4, released on 2020-10-15.

waiting for the resolution

thank you so much

So, wager in your prize. First time wagers of a particular online casino recreation might try it first earlier than they guess their own cash and take the prospect at profitable the prize and even hit the jackpot.

Jackpot Slots play like common online slots with the welcome addition of a jackpot prize. There are several guidelines to observe and several video games to play on the net.

If you wish to practice before hittin

visto per il canada Som en del af sin fælles aftale med USA om bedre sikring af begge landes grænser startede Canada fra august 2015 og fremad Visumfritagelsesprogram for visse lande, der

er fritaget for visum hvis borgere kunne rejse til Canada ved i stedet at ansøge om et elektronisk rejseautorisationsdokument, der er kendt som eTA for Canada
